EVALUATION FORM PART – 2 (Submittal/Program Evaluation)

Instructions to GTBR Contractor Safety Awards Review Committee

The following criteria will be used to rate the Safety Management Systems of the contractor organization as submitted in their application for award. If all criteria exist in each category, they would be given the highest rating of 10 or rated as 9.5 if one element is missing and so on. The review committee may give partial credit for a weakness in the criteria. The Safety Management System should also address subs and points deducted based on percentage usage of subs if not considered in each item (if subs are 20% of their work and not included in the system, subtract 2). The ratings for each would be entered on the Rating Form – Part 2 and the total calculated.
