

September 20, 2023

Greetings:

The highly-anticipated 2nd Annual SETX Women in Industry Week will be held March 6-11, 2023. Female leaders from the Southeast Texas industrial community will unite with the goal of mentoring young ladies in schools across the region who have shown an interest in STEM-related careers. There will be a variety of exciting events throughout the week that connect young ladies with female executives in a broad range of careers and specialties. SETX Women in Industry Week aims to showcase the many career opportunities that exist within industry.

The schedule of events includes:

- **Monday, March 6 – Women in Industry Mixer**
- Women in industry from across the region are invited to this opening event. This is social mixer meant to introduce subject matter experts, event hosts, and other attendees to one another.
- **Tuesday, March 7 – Women in Industry Networking Luncheon**
More than 100+ (female) leaders in industry and 100+ students interested in following in their footsteps are invited to the luncheon. Presented in a unique format, the luncheon provides a platform for each leader to tell their story to their table, but also engage in meaningful conversation with student-attendees, to share their lessons learned and the path they took to get to where they are currently in their career.
- **Wednesday, March 8 – Coffee Chats at colleges and universities across the region**
College students are invited to have one-on-one conversations with leaders in industry at Lamar University, Lamar Institute of Technology, Lamar State College- Orange, and Lamar State College- Port Arthur.
- **Thursday, March 9 – Speed Mentoring at regional high schools**
Facilitated by the US Coast Guard, speed mentoring opportunities are offered to the area high schools, where industry professionals start the framework for mentor-mentee relationships with quick one-on-one mentoring sessions.

SETX Women in Industry, a newly formed 501(c)(3) organization, will be coordinating the events. All proceeds from this week will benefit scholarships for female students going into the industrial workforce, with the sponsor playing a key role in the allocation of those funds.

If you see value in this program, we humbly ask for your support. Contributions and reservations may be made on the attached sponsor form, or by mail to ISTC.

We appreciate your support of the students who are the future of industry.

With Gratitude,

Nakisha Burns
ExxonMobil

Katie Celli
GTBR & ISTC
